

# SLATE

Be bold with Slate. As a sedimentary stone, Slate is composed of wafer thin layers, compacted to a durable hardness. Strong, hard-wearing and luxuriously tactile, Slate offers a robust alternative for both floors and walls.

Superbly coloured with a mottled patterning, Peacock™ Slate combines rich blues and a metallic sheen for a stylish and provocative choice of tiling. Victoria Gold™ Slate is streaked with warm veins of honey, brown and gold that will lend drama and glamour to any room. Peacock™ and Victoria Gold™ can be used with equal appeal both indoors and outdoors.

## SIZES

<b>Peacock™</b> 400 x 400mm	<b>Peacock™ Mosaic</b> 25 x 25mm 50 x 50mm 25 x 50mm	<b>Victoria Gold™</b> 400 x 400mm 600 x 600mm
--------------------------------	---	---

---

## RECOMMENDED APPLICATIONS

This product is suited for both interior and exterior floors and walls. Due to its uneven surface these products are more slip resistant than a polished finish and are ideally suited for exterior use.

---

## LAYING RECOMMENDATION

- A 5-10mm joint between tiles
  - The use of grey tile adhesive
  - Grey quarry grout
  - Existing expansion joints are to be respected and not tiled over
  - Use expansion joints as prescribed by architect or specialized tiler
  - Tiles should be laid on a level and even screed which should have been cured for about one week before tiling
- 

## PRODUCT CARE AND MAINTENANCE

All natural stone tiles should be sealed to prevent staining. The laid tiles should be washed with Delta Research Clean Stone which is a neutral stone detergent. After washing and rinsing the stone must be left to dry completely. As an anti-stain treatment we recommend the use of Delta Research Seal (Natural look), Delta Research SAF Seal (Satin look) or Delta Research Wet Seal (Wet look). The product must be applied by professionals or under strict instruction as indicated by Delta Research.

For everyday maintenance we recommend Delta Research Clean Stone or a neutral pH detergent. Do not use acid or alkaline detergents as repeated application will damage the sealer leaving the stone unprotected.

Remember to ask us about your warranty options.
