

# LIMESTONE

Sample the refined simplicity of Limestone. These natural stones hail from the Mediterranean and South Asian regions where for centuries they have been valued for their luxurious texture and consistent colour.

Choose between French Vanilla™ with its tan and honeyed brown colours, the diesel blue and wavy surface texture of Azure™, the darker charcoal coloured Ebony™ or the brilliant off-white Capri™.

# LIMESTONE

## SIZES

<b>French Vanilla™</b>	<b>Azure™</b>	<b>Ebony™</b>	<b>Capri™</b>
400 x 400mm	400 x 400mm	400 x 400mm	457 x 457mm
600 x 600mm	600 x 600mm	600 x 600mm	610 x 610mm

---

## RECOMMENDED APPLICATIONS

Ebony™, Azure™ and French Vanilla™ Limestone are suited for interior and exterior use on floors and walls. Capri™ Limestone, due to its pale colour, is best suited for interior use on both floors and walls and exterior use on walls.

---

## LAYING RECOMMENDATION

- A 2mm joint between tiles for Capri™ and a 5-10mm joint for French Vanilla™, Azure™ and Ebony™
  - The use of white tile adhesive for Capri™ and grey tile adhesive for French Vanilla™, Azure™ and Ebony™
  - White grout for Capri™, grey grout for Azure™ and Ebony™ and 2 parts Travertine grout to 1 part building sand mix for French Vanilla™
  - Existing expansion joints are to be respected and not tiled over
  - Use expansion joints as prescribed by architect or specialized tiler
  - Tiles should be laid on a level and even screed which should have been cured for about one week before tiling
- 

## PRODUCT CARE AND MAINTENANCE

All natural stone tiles should be sealed to prevent staining. Capri™ Limestone is supplied pre-sealed to prevent staining during the laying process. Post installation sealing is required. The laid tiles should first be washed with Delta Research Clean Stone which is a neutral stone detergent. After washing and rinsing the stone must be left to dry completely. Delta Research Basic Cotto should be applied as a primer to Capri™ Limestone. As an anti-stain treatment we recommend the use of Delta Research Seal. The product must be applied by professionals or under strict instruction as indicated by Delta Research. To protect Capri™ Limestone against scuffing, we recommend applying floor wax (interior only), and for everyday maintenance Delta Research Clean Stone or a neutral pH detergent. Do not use acid or alkaline detergents as repeated application will damage the sealer leaving the stone unprotected.
