

MARBLE

Choose the classic splendour of Marble. One of the most beloved of all natural stones, Marble has long been prized for its magnificent luster and durability. Available in a full spectrum of colours, ranging from cloudy pale tones to rich dark hues, Marble harks back to a bygone era of luxury.

Polished Marble exudes a lavish high-gloss sheen that adds a classic glamour to any living space. Alternatively, Patinato is obtained by brushing the stone until it has a natural, worn feel. The Patinato finish creates a charming aged look that adds discreet elegance for any area of your home.

RECOMMENDED APPLICATIONS

Polished Marble is suited only for interior applications. It is extremely popular in bathrooms and living areas for floor and wall tiling. Polished Marble is not recommended for kitchen floors due to possible spillages of acidic/corrosive substances. Patinato Marble can be used in both interior and exterior applications. Due to the uneven surface the product is more slip resistant than the polished finish but for external applications we further recommend an acid treatment to increase slip resistance.

LAYING RECOMMENDATION

- A 2mm joint between tiles
- The use of white tile adhesive
- Ivory or Travertine grout
- Existing expansion joints are to be respected and not tiled over
- Use expansion joints as prescribed by architect or specialized tiler
- Tiles should be laid on a level and even screed which should have been cured for about one week before tiling

PRODUCT CARE AND MAINTENANCE

All natural stone tiles should be sealed to prevent staining. The laid tiles should be washed with Delta Research Clean Stone which is a neutral stone detergent. After washing and rinsing the stone must be left to dry completely. As an anti-stain treatment we recommend Delta Research Stop Damp for polished Marble and Delta Research Seal for patinato Marble. The product must be applied by professionals or under strict instruction as indicated by Delta Research.

For everyday maintenance we recommend Delta Research Clean Stone or a neutral pH detergent. Do not use acid or alkaline detergents as repeated application will damage the sealer leaving the stone unprotected.

For polished Marble tiles we recommend Embassy be applied and buffed to offer a high gloss and extra protection.
