

TUMBLED TRAVERTINE

Tumbled Crema+cobbles

Tumbled Classico™

Tumbled Noce+cobbles

Tumbled Rosso

Tumbled Giallo

Reminiscent of the cobbled streets of Tuscany, Travertine is also available in tumbled and cobbled styles. Tumbled Travertine tiles are treated to an abrasive process that leaves them looking naturally worn, with a charming aged Patina. Travertine cobbles are particularly well suited to exterior surfaces such as driveways and pathways.

200 x 200mm	610 x 406mm	Cobbles:	Tumbled Giallo
406 x 406mm		100 x 100 x 30mm	100 x 100mm
610 x 610mm			150 x 150mm
Cobbles: 100 x 100 x 30mm			

RECOMMENDED APPLICATIONS

This product is suited for both interior and exterior floors and walls. It can be used virtually anywhere in the house and is extremely popular in kitchens and bathrooms. When used on floors the holes will eventually fill with residues over time giving the effect of a more rustic floor. The more traffic, the better the stone will look. Cobbles are ideally suited for exterior floors such as driveways and pathways.

LAYING RECOMMENDATION

- A 5mm joint between tiles
- The use of white tile adhesive
- Travertine grout
- Existing expansion joints are to be respected and not tiled over
- Use expansion joints as prescribed by architect or specialized tiler
- Tiles should be laid on a level and even screed which should have been cured for about one week before tiling

PRODUCT CARE AND MAINTENANCE

All natural stone tiles should be sealed to prevent staining. The laid tiles should be washed with Delta Research Clean Stone which is a neutral stone detergent. After washing and rinsing the stone must be left to dry completely. As an anti-stain treatment we recommend the use of Delta Research Seal or Delta Research Saf Seal. Delta Research Wet Seal can be used if colour enhancement is desired. The product must be applied by professionals or under strict instruction as indicated by Delta Research.

For everyday maintenance we recommend Delta Research Clean Stone or a neutral pH detergent. Do not use acid or alkaline detergents as repeated application will damage the sealer leaving the stone unprotected.

Externally and on wall cladding, Tumbled Travertine can be cleaned with a high pressure cleaner.

Remember to ask us about your warranty options.
