SIZES

We have a wide variety of sizes, shapes and finishes available. Please speak to one of our sales consultants for more details.

RECOMMENDED APPLICATIONS

This product is suited for both interior and exterior use.

As this is a natural product, one can expect slight colour variations between batches. Please arrange a product preview, either by photograph, or at one of our distribution centres in order to view the current stock.

PRODUCT CARE AND MAINTENANCE

All natural stone tiles should be sealed to prevent staining. The laid tiles should be washed with Stone Shield Deep Clean which is a stone detergent. The tiler must ensure that no grout or adhesive is allowed to dry on the tile surface. No Acid is to be used in the removing of grout/adhesive residue. After washing and rinsing the stone must be left to dry completely. As an anti-stain treatment we recommend the use of Stone Shield Marble, Granite and Travertine sealer. The product must be applied by professionals or under strict instruction as indicated by the manufacturer. Sealers may cause enhancement of the natural colours of the stone depending on the stone type and sealer used. Please speak to a consultant should you wish to have a demonstration of the finished product.

For everyday maintenance we recommend Stone Shield Daily Clean or a neutral pH detergent. Do not use acid or alkaline detergents as repeated application will damage the sealer leaving the stone unprotected.

Remember to ask us about your warranty options.

The colours shown on this spec sheet are as exact as photographic and printing processes as well as screen resolution allow. We recommend that all colours are chosen from actual product samples available on request.
