

# TECNO

## SALONI cerámica

460 x 460mm

The Tecno range is characterized by its uniform colour and slightly textured surface. It is available in two popular colours, Beige and Gris. In addition it has the benefit of being available in an anti-slip finish.

## SIZE

**Grey bodied, not rectified**

460 x 460 x 9,5mm

---

## RECOMMENDED APPLICATIONS

The Tecno range is suitable for both residential and commercial floor applications, including areas exposed to moderate to high traffic. Due to it being available in an anti-slip finish, it is especially recommended for outdoor tiled areas. \*

---

## LAYING RECOMMENDATIONS

- A 2-5mm joint between tiles.
  - The use of TAL Professional tile adhesive.
  - The use of TAL grout  
Arena – Beige grout  
Gris – Light Grey Grout
  - Existing expansion joints are to be respected and not tiled over
  - Use expansion joints as prescribed by architect or specialized tiler
  - Tiles should be laid on a level and even screed which should have been cured for about one week before tiling
- 

## PRODUCT CARE AND MAINTENANCE

Due to the extremely low permeability of Porcelain, it is highly resistant to stains. Spills should however be cleaned as soon as possible and the surface cleaned with warm water and a mild household detergent. For everyday maintenance we recommend cleaning with any mild household detergent and rinsing with warm water.

Due to the rough surface texture of the anti-slip finish, scuff marks, which can occur, are easily removed with normal household detergent and a stiff bristled brush.

\* For more detailed technical information regarding recommended applications please speak to one of our sales consultants.

Tiles have a variation so random that one tile may have colours totally different from other tiles of the same type. The final installation therefore will be unique, much like natural stone.

\* **NOTE:** The "V" ratings are not an indication of quality of the tiles, but rather an indication of the variation in tone that has been intentionally designed this way to deliver a particular effect in the finished product
